BUSINESS OWNER | SIN FAT STUDIO | DEC 2005- SEPT 2012 | MAURITIUS

The main family business. We take portrait photographs and run a photo lab. As a computer graduate, I went back to help my family computerise the business and digitalise the photo lab, at the risk of the business fading away due to the shift from negative to digital printing. We are now fully digitalised and up to date with market demand. It was an important decision to leave my pursue in software development career, but it was worth it.

BUSINESS OWNER | PICTURA FRAMES | SEPT 2012 - APR 2016 | MAURITIUS

An expansion of the family business to produce high quality picture and art frames, both on production and custom made. I built the company from scratch, importing the machinery from South Africa and supply materials from UK, China and Malaysia. I managed production and sales. The business is still running at present.
